

Eyewear Formulary for Versant Health Client Members

Versant Health is pleased to present the formulary associated with its eyewear dispensing program.

As part of our vision to make Davis Vision and Superior Vision the most trusted vision plans for eye care professionals, Versant Health has undertaken several operational enhancements, including investments in operations, call center services, and streamlined payment technology.

Our eyewear dispensing program, which includes the following formulary and an eye care professional portal, is among our most exciting enhancements!

We have entered into an agreement with Essilor to fulfill lab orders using its nationwide laboratory network. You will now dispense eyewear orders from a catalogue featuring products from Essilor, Shamir, and Kodak. You will see that the formulary includes a wide array of eyewear using advanced technology and broad choice in lens functionality.

Essilor is the largest eyewear manufacturer in the world, with a nationwide network of labs. Through this agreement, we are able to offer you and your patients:

- a large variety of lenses, including the most utilized and requested digital progressives, anti-reflective coatings, and blue light protection,
- access to products resulting from Essilor's industry-leading research and development investments,
- a network of labs across the country, which can improve turnaround time on orders, and
- cost stabilization due to the purchasing power that Versant Health's 38 million client members give us.

We look forward to continuing service to you and your patients.

Please see the next page for the updated eyewear formulary.

Brought to you by  **VersantHealth[®]**
